CCNA | RHCSA | Security+ |

EDUCATION & CERTIFICATIONS

Certifications:

- **Cisco Certified Network Associate (CCNA) – (2026 – 2029)**
- **Red Hat Certified System Administrator (RHCSA) – (2024-2027)**
- **CompTia Security+ -(2024-2027)**
- **AWS SysOps Administrator – (2023-2026)**
- **AWS Developer Associate – (2023-2026)**

Cloud Infrastructure Labs

AWS Cloud Institute

- Completed 100+ interactive labs involving AWS Services, designing and deploying AWS cloud infrastructure, networking, IAM policies and serverless services.
 - Gained hands-on experience in AWS core services, Linux, Python, cloud security, AI/ML, and networking concepts.
 - Gained experience in cloud monitoring, automation with CloudFormation & Terraform, CloudTrail and Secrets Manager to ensure secure cloud operations.
 - Collaborated and led team-based labs to solve real world problems, demonstrating strong teamwork and problem-solving skills.
-

SKILLS & EXPERTISE

- **Linux Administration:** Installation, configuration, and management of Red Hat Enterprise Linux systems.
 - **Networking:** TCP/IP networking, subnetting and VLSM, VLAN configuration, routing fundamentals (static routing, OSPF), NAT, DHCP, DNS, HTTP/HTTPS, OSI model, and network troubleshooting.
 - **Operating Systems:** Ubuntu, Red Hat Enterprise Linux, Windows
 - **Security:** Security Monitoring, Incident Response
 - **Infrastructure as Code:** Terraform, CloudFormation, Ansible
 - **Programming Languages:** Python, Bash
 - **Cloud Services:** AWS Cloud (IAM, EC2, S3, DynamoDB, Rekognition, Lambda, API Gateway, VPCs, Bedrock)
 - **Tools:** Git, ServiceNow, Proxmox, AWS CLI
-

PROJECTS

Splunk Logging in AWS (<https://blog.theawsdev.com/splunk-aws-lab>)

Platforms and Technology Used: AWS, Splunk Enterprise (SIEM), Log Analytics, Terraform

- Implemented centralized logging and monitoring using AWS services and Splunk to improve visibility into system activity and security events.

Event Driven Image Detection (<https://blog.theawsdev.com/project1>)

Platforms and Technology Used: AWS Rekognition, Lambda, S3, DynamoDB

- Developed an event-driven image detection system using AWS services to automate image analysis and storage.

PROFESSIONAL EXPERIENCE

Business Systems Analyst Technician

10/2019 – Current

Humana | Tampa, FL

- Supported production systems for a large enterprise healthcare environment by triaging Tier 3 incidents and restoring service during outages, achieving an 85% first-resolution rate within SLA targets.
 - Improved the claims adjudication process by designing and implementing XML macro scripts, resulting in a 15% increase in production efficiency.
 - Document incident diagnostics, remediation steps, and system changes within ServiceNow to support knowledge sharing and operational continuity.
 - Analyzed recurring production incidents to identify root causes and improve troubleshooting workflows, increasing platform reliability.
 - Developed technical documentation and workflow diagrams to support troubleshooting procedures and operational processes.
 - Communicate issues, resolutions, and status updates clearly while exercising independent initiative and judgment during service restoration.
-

ACHIEVEMENTS

- **AWS National Jam – US TA - 2024 Winner**
 - Collaborated and led team-based labs to solve real world problems, demonstrating strong teamwork, problem-solving skills and delivering solutions under time constraint.
 - **Claims Process Improvement**
 - Improved the claims adjudication process by designing and implementing XML macro scripts, resulting in a 15% increase in production efficiency.
-
